

TELEDYNE HASTINGS INSTRUMENTS

Everywhere you look™

- HFM-D-301A/B** Mass Flow Meter
- HFC-D-303A/B** Mass Flow Controller
- HFM-D-305A/B** Mass Flow Meter
- HFC-D-307A/B** Mass Flow Controller

FEATURES

- 301/303 Range 0 - 25 slm to 0-1000 slm
- 305/307 Range 0-1000 slm to 0-2500 slm (N₂ Equivalent)
- Excellent Accuracy
±(0.5% of Reading + 0.2% of Full Scale)
- Touchscreen Display Option ("B" Series)
- USB ("B" Series)
- 0-5 VDC, 0-10 VDC, 0-20 mA or 4-20 mA I/O
- RS232 / RS485
- Typical Settling Time:
 - HFM-D-301/305 < 1 second
 - HFC-D-303/307 1 -2 seconds
- Self-diagnostic Status LEDs
- Auto-Zero (Controllers Only)
- Totalizer
- Large Diameter Sensor Tube (low dP)
- IP-67 Version Available
- Operating Pressures to 500 psi or higher
- NIST Traceable Calibration

APPLICATIONS

- Leak Testing
- High Purity Gas Delivery
- Heat Treat
- Gas Blending
- Secondary Calibration Reference
- Fuel Cell R&D
- Environmental Monitoring

BENEFITS

- High Accuracy
- Fast Metering Response
- Superior Linearity
- Rapid Controller Settling Time
- Digital Extended Range

Mass Flow Meters & Controllers

HFC-D-303A Mass Flow Controller

Optional Touchscreen Display

Data Logging Software

Description

The Digital 300 Series of thermal mass flow meters and controllers from Teledyne are designed to accurately measure mass flow without corrections or compensations for gas pressure and temperature. They are accurate to better than $\pm(0.5\%$ of reading + 0.2% of full scale) for full scale flow rates from 0-5 sccm to 0-25 slm.

The Digital 300 Series uses a thermal-based mass flow sensor. This sensor is designed to provide exceptional linear response to changing flow rates. In addition, the electronics associated with each sensor are precisely tuned to give fast response times. The HFC-D-302A & B flow controllers feature a precision solenoid proportional control valve. Teledyne configures and tests each individual valve based on the users flow rate, gas, and pressure conditions.

"A" Series

The A Series of the Digital 300 line of thermal mass flow meters and controllers utilizes a 15-pin d-sub connector which is compatible with Teledyne Hastings' power supplies and cables. The Series also employs dual RJ communication ports for RS232/485 communication. The A Series is backwards compatible with previous versions of Teledyne's Digital 300. Also, the A Series can be configured with the optional IP-67 enclosure to provide protection against water and dust.

"B" Series—300 Vue

The B Series features an optional touchscreen display which allows the user to view and control the flow rate directly from the flow controller. The main screen displays the flow rate, the flow setpoint (in the case of a flow controller), the units of measure, and the valve mode (Auto, Open, Closed). The user also has access to menus that allow quick configuration of the flow instrument for changing requirements. The display can also graphically display changes in flow over time. The B Series also features a USB port which is standard on all meters and controllers. Both the A & B Series are compatible with Teledyne's data logging software.

Teledyne Hastings Instruments reserves the right to change or modify the design of its equipment without any obligation to provide notification of change or intent to change.

Digital 300 Series Flow Sensor

The Digital 300 Series is built using a patented (Patent #6,125,695) flow sensor. The sensor's excellent linearity, in turn, leads to improved accuracy. Flow calibrations are typically performed in N₂ or air. The output can then be scaled for use in other gases (see graph to the right). The 300 Series excellent linearity allows the linearity to be retained when switching from the calibration gas to the process gas.

The patented sensor contains fast electronic circuitry. This is critical when the flow meter is coupled with a proportional control valve to create a thermal mass flow controller. The fast response of the sensor combined with high-speed digital control gives the user excellent control of the process gas flow.

The sensor tube utilized in the flow sensor has a relatively large diameter. This allows the Digital 300 flow meter to have a small pressure drop. A low differential pressure drop across the flow meter is ideal for leak detection and gas sampling applications.

<i>Specifications</i>	<i>HFM-D-301A/B & 305A/B (flow meter)</i>	<i>HFC-D-303A/B & 307 A/B (flow controller)</i>
Full Scale Ranges:	HFM-D-301A/B (L): 0-25 slm to 300 slm (N ₂) HFM-D-301A/B (H): 0-300 slm to 1000 slm (N ₂) HFM-D-305A/B: 0-1000 slm to 2500 slm (N ₂)	HFC-D-303A/B (L): 0-25 slm to 300 slm (N ₂) HFC-D-303A/B (H): 0-300 slm to 1000 slm (N ₂) HFC-D-307A/B: 0-1000 slm to 2500 slm (N ₂)
Accuracy	± (0.5% of reading + 0.2% of full scale)	± (0.5% of reading + 0.2% of full scale)
Repeatability	± 0.15% of full scale	± 0.15% of full scale
Maximum Working Pressure	500 psig (Optional 1000 psig for HFM-D-301)	500 psig (Optional 1000 psig for HFC-D-303)
Operating Temperature	-20 — 70°C in non-condensing environment	-20 — 70°C in non-condensing environment
